In addition, extensions to the AutoCAD software by third parties, most notably Autodesk's Autodesk Exchange Apps, which allow users to extend the functionality of AutoCAD, provide additional features to AutoCAD users. Design AutoCAD 2017 and older versions have the ability to connect to Microsoft Access databases, creating a link to a database through which data can be read and manipulated. This is a database component, not an application. It can only read data; it cannot create or modify data. A more powerful version of this is an add-on called Access DataSaver. The Access DataSaver allows the user to view, query and manipulate database data. Other than the ability to create new data records, the DataSaver is the same as Access. In addition, AutoCAD is able to manipulate CAD data stored in other file formats, most notably DWG (and DXF) data. AutoCAD can import and export CAD data in the following file formats: Autodesk DWG (DWG, DWF) Autodesk ISO (ARW) Autodesk DXF CADR (3ds Max) AutoCAD Asymptote BRL-CAD (a C++ based framework) Gerber (a proprietary format used by silkscreen printing and many other print-based industries) AutoCAD also allows the user to import and export to the following file formats (in addition to the ones listed above): DXF (AutoCAD) Mef (Microsoft Exchange File Format) PFS (Persistent Format Specification) A subset of these import/export file formats are also included in AutoCAD R14 and later releases. Imports are stored in a default location known as the In-Place Data Store (IPDS), and can be viewed and used in the "Data" tab of the command line. Imports can be named using the standard name found in Excel. If you do not want to use the default import name, you can use the standard name, which is the same as the file name. The standard name is the name specified on the drawing. The import name can be edited and saved. The export process has more options available, as it allows the user to select the save location and save the file as a CAD standard file format. AutoCAD is supported on 64-bit versions of Windows. a1d647c40b
