To collect the data, which will improve the game's physics and responsiveness to player movements in real-time, EA Sports invited 22 professional footballers to take part in a match with a 4-4-2 formation with a standard full international kit. The best attempt of each player was then recorded, in a process the company calls "DynaBlox." Players were recorded from wide-angle shots, and using all parts of the body. To ensure there were no variables that could impact the player's performance, the players played under identical conditions. The resulting data was then turned into human-like avatars. "We've taken a massive step up to make this match real. Every player's motions have been captured by our high-performance suit, so you'll feel the weight and movement of players like never before," said Peter Riegler, Executive Producer at EA SPORTS. "In the past, you might have been able to get accurate player movements, but you'd have to settle for a full-body design. No more. The detail of a player's unique movements are now a part of our game." FIFA 22 introduces 11 playable national teams with full-realism and playable AI. New award-winning gameplay features include the ability to chip the goalkeeper from every direction, a brand-new corner kick system, new gameplay affecting abilities, and dynamic Real Player Motion Technology. Additionally, the popular FUT Draft and Ultimate Team Seasons offer brand new features for Ultimate Team and Manager modes. The list of improvements continues as the number one sports title in the world adds even more ways to enjoy the game in the creation of fan-inspired content. FIFA 22 delivers a massively improved game engine built on a new human-like engine. The team-based game engine, called the FIFA Engine, will power all FIFA titles from the next console launch and beyond. It features a new ball physics system, which will emulate the unpredictability of the ball in the real-world, allowing you to perform incredible tricks and increase the responsiveness of your players. Players will be able to dribble past defenders, with real reaction and weight. A new engine integration for player AI is also introduced, giving players the ability to kick the ball while backing up and threatening the goal. "When we set out to evolve our game engine, we knew we wanted to push the boundaries of the series. We've been able

Features Key:

- Full body movements: Matchday animations provided to great effect by the introduction of "HyperMotion Technology", which is able to use real-life player data to animate on-pitch movements through integration into the gameplay models to replace existing animations. This gives players exacting body movements, putting the finishing touches on the incredible fluidity they've become known for.
- Natural passing: Players will be more dynamic in their ball movements, generating less artificiality and betraying their methodical passing with more natural or player-like movement.
- All-new dribbling: Adding a new dribble system to FIFA for the first time since the FIFA 13 release. Players can now move in dribbling situations by initiating an attack and then, using judicious positioning and head-down dribbling controls, complete a pass or shoot. Players will now be able to perform "give and go" dribbles, creating a combination play system where players change direction quickly to create openings or to score.
- Different tactics: Players will enjoy faster, more dynamic gameplay that allows for more diverse passing combinations and situational variations.
- Camera work: New ball physics model and camera work give the ball more control and knock back, adding further realism. The new dribbling system makes it easy to move the ball quickly in tight spaces. Players will be able to pick the ball up from the ground, changing and focusing their movements to see better options on the pitch.
- Teamwork: A new system will allow managers to exploit a team's weaknesses to score against their rivals, offering a fresh and new team advantage.
- Infinite creativity: Create the history of football in FIFA. Manage your franchise for multiple

seasons with multiple managers.

FIFA Ultimate Team offers all the depth of Ultimate Team, which lets you select your preferred team of players, then customize a team to your liking. You'll earn packs as you play through the game, and you can also earn coins from completing in-game challenges and via a new casino-style mini-game. The coins can then be redeemed for a wide variety of items in the FIFA Ultimate Team store including new players, new jerseys, kits, and stadium renovations. And as a FUT Draft user you can make the most of the game's Draft mode, which lets you build a dream team of 24 players from a pool of over 6,400 unique player cards. Online competition - FIFA is rated M for Mature by the ESRB, which means that you'll be able to experience a multitude of experiences that are designed for a broader audience and contain more adult content such as vulgar language and strong violence. Note that some of these features will be removed for players under the age of 18. But if you want a deeper gameplay experience, online FIFA 22 offers the same content as the offline version. And with online leaderboards, online tournaments, and more, you'll be able to compete with people from all over the world in every mode. Under the legislation, the first marriages will be legal by the start of 2014, regardless of whether a court ruling has overturned a state law banning same-sex marriage. The legislation still awaits Gov. Andrew Cuomo's signature.

What's new in Fifa 22:

- **New Player Development Model - Personalise your stars with more detailed and unobtrusive Player Development - making player creation quicker and more intuitive. Create superstars from players progressing through all roles in your squad, by watching a casual or passionate football match, and *then* diving into detailed digital training sessions to tune your stars' skills in-engine.**
- **Hover to control each player's skill. - As players move the ball, use the new control stick to hone their technique with new animation and reactivity. Just hover your stick over the player to discover how to move them - creating an easy-to-understand player movement system.**
- **Newly-created Player Types - Choose from a range of newly-created types to develop your own new additions to the game. You can choose from a keeper, a winger, a centre-forward, or even a poacher - all from a new, simulated playing style that takes inspiration from some of the best players in the world.**
- **Explosives Prediction - Reveal the likelihood of a run, cross, or shot - not from a context-sensitive screen, but by hovering your player and watching the skill animations in-engine.**
- **HIDDEN OBJECTIVE Solutions - Dive deeper into the secrets of hidden objectives with a new offer called "Secret," which will reveal more of the hidden tactical information based on your gameplay. Complete Secret tasks to unlock story-based bonuses in-game, and higher-level objectives to unlock new talking heads, awards, and finally, The Vault.**
- **Hover over the card to instantly call your teammates to turn it. - Coaches can call in plays and join with their teammates in the middle of the action with a fully-immersive shooting mechanic. Drag to shoot and pull back for a long range goal, then quickly pull back out of bound to call in a teammate to free an unmarked player.**
- **Draft a transfer set from 12 crowd-selected superstar players. - By tapping the icon of your favourite player,**

you'll be able to select from a cohort of recommended 10 player partners, chosen by experts at EA Sports. You can then add this new player into your team and begin building a squad around them that's uniquely yours.

- **New video libraries including FIFA's first cinema-grade motion capture. - Immerse yourself in the atmosphere**
