Beherit Studios proudly presents Judgment: Original Soundtrack. Developed by Tecmo, Judgment is an action adventure shooting game set in a post-apocalyptic future. The game follows protagonist Niko Bellic, a young man, who travels to war-torn Eastern Europe to steal a briefcase full of money, unaware of what is inside. Niko is recruited to a private military company by a former comrade-turned-rival, who offers him a chance to avenge the death of his father at the hands of the warlord, the "Keeper." As Judgment progresses, Niko gains more allies, allies, and equipment. His mission is to find the Keeper and kill him. Along the way he collects power-ups, upgrades, weapons, and vehicles. More enemies show up, including new factions and unexpected new enemies. And he must avoid traps and survive the dangers of the wasteland. The Judgment: Apocalypse Survival Simulation is built on a 2D top-down tile map system. The gameplay is a combination of action/adventure, platforming, and simulator. The key object in the game is the character Niko Bellic, who can sprint, jump, use firearms, melee weapons, and use various vehicles. Judgment Features: Fighting System: I guess you could call the combat in Judgment a "strategic fighting system". Basically, you have a maximum amount of energy you can spend. In fights you can get hit and you lose a portion of your energy. As your energy is depleted, you have to wait until your energy recovers. During certain encounters, you can use a special attack that does lots of damage in a short amount of time. This attack has a special attack gauge that fills up as you use special abilities. You need to use special abilities to recover energy. Combat: The combat system is fun, simple, and quirky, but it will take a bit to get use to. You can aim with the mouse or controller. There are a lot of different weapons to choose from. Weapons have different strengths, ranging from a weak handgun, to a powerful rocket launcher. You can aim with the mouse or trigger a special attack. The special attack is a short attack that does a lot of damage. The skills you can use depend on your weapon type. Each weapon has different special abilities, like the pistol shooting out mini-explosions or rocket launchers firing rockets. Vehicle Driving: Each character has a few different vehicles. You have the basic car, but there

Felix (the main character) is an adventurer who lives on the idyllic northern island of Lutwyche, far from the concerns of the outside world. He's looking for the holy grail, an artifact of immense power that was swallowed by a beast called the Destroyer who now patrols the world of Lutwyche. The grail is Felix's dream, and he vows to get it for himself. "Zeran's Folly" was named after Felix's father, Zeran, who is immortalized in the game. His ashes are scattered on the beach in his son's honor and whenever the holy grail is mentioned, this plays a jaunty tune. Play with the whole family. Felicia is Felix's brother, and she can change outfits and play mini-games by herself. When Felix is playable alone, it is possible for him to live with his friend Sam, a friendly alpaca. They live in the gloomy ruins of an abandoned stone manor. Recruit a friend to come along with you, just like Zeran. Enter their name in the multiplayer section to find them. Zeran's Folly is set in a mysterious world where mysteries abound. It features dozens of weapons, armor sets, and magical artifacts to discover. It also features hundreds of enemies who challenge Felix's skills and abilities. Enter dark and foreboding dungeons and have it out with an assortment of creatures, including rats, vampires, flying pigs, and mutant badgers. Customize your armor and weapons and unlock upgrade slots to increase their damage and attack

speed. Exclusive to Zeran's Folly, there are many accessories you can find. These include hats, glasses, and golden rings to gain special abilities. There are also several minigames you can play to earn these accessories. Play the Mini-games that earn you accessories, and also play the minigames in the rest of the game. In "Zeran's Folly" these are known as the Duel game, the Gel-Blast game, the Blackjack game, and the Hoverboard surfing game. You can rebind the controls to your liking via the "New Map" feature, so feel free to experiment with different controls. The "Upgrade List" feature reveals the full value of your gear, as well as the extras you can unlock by equipping specific items. Rewards earned from dead enemies can be used to buy powerups from the shop, including c9d1549cdd

shows a prison break style scenario. You start on the top of a fence looking down on a small courtyard. Use your head to hack into a terminal and view the names of inmates down below. If an inmate's name appears green, pick them up and bring them to the yard. Once you have the entire crew on the yard, you will be able to see that some inmates are bleeding and break through the security gate. It's up to you to use the hostages to free the other inmates. Once they are freed, you can head into the prison to finish the job.
