Program Protector Download Latest

Are you afraid that other people can see sensitive content while you're accessing your Windows programs? Do you want to stop them from deleting your files? Or are you sick of those people who constantly steal your ID card and home address? If your answer is "yes" to any of these questions, then you should try out Program Protector. Program Protector gives you complete protection and control over your PCs with just a click. You can secure the programs you need for your work, private life, and leisure. You can make a public or private list of which programs are password-protected and password-protect them at will. Set a password to restrict access to specific files, folders and entire programs. You don't have to change the settings for each individual program; just set it once and it will work for all of them. Place each password-protected program in a group. To ensure that every user of your machine has access to the specific program only, place its related group in the list. Just drag-and-drop a file or folder to the program protector list and it will be automatically protected. You can run the protected program and view its contents through our graphical interface, or even edit them directly. You can also change the settings and run your selected program at any time through our graphical interface.

Additionally, we include an inbuilt help guide to ensure that you're able to use our software properly. It offers recommendations for your work, business, and private life. Limitations: The free trial version only allows you to protect up to three Windows programs. This version comes without a guarantee. The price is to be paid in order to access the full version. You should only use the program for your personal use. What is new in this release: 1. This is a cumulative version (with 1.0.3). 2. This version is the final one, that is is no longer available for free download. 3. This version includes all features of the previous version except for the ability to log program usage. You may download pakcodelib.dll and pakcodelib.dll, part of Program Protector directly, estimated download time by ADSL or EDGE [~128 Kbit/s] is 0:00:47. Just write the reviews of the Program Protector. Buy Program Protector license at lizlazapps.com. System requirements are unspecified. Program Protector for Windows work on All Windows versions. No guide or FAQ available for Program Protector. Program Protector is a small software application whose purpose is to help you password-protect any Windows program in order to restrict other users' access to your private content. User-friendly layout You are welcomed by a clean and intuitive layout that allows you to set up the dedicated parameters in a short amount of time. A help manual is included in the package in case you want to find out more about the setup process. Encryption settings Program Protector gives you the possibility to block access to a program by manually specifying the executable file and setting up the password. In addition, you are allowed to drag and drop software tools or shortcuts directly into the configuration panel. The application displays a list with all password-protected utilities directly into the main window and offers you the freedom to unprotect the selected one with a single click. Other important features worth being mentioned enable you to change the password of the current tool, run the selected executable file, set up a master password in order to prevent unauthorized users for making changes to your settings, as well as view logs which include details about the protected programs' usage (time, program, and event). A few configuration settings are hidden under the hood for helping you customize the message that is displayed each time someone tries to access a password-protect tool. You specify the title of the b7e8fdf5c8
