Start Start is the startup application in AutoCAD LT and AutoCAD WebCenter. It can open drawings, toggle the dialog box and display features like physics, and it can also perform a number of other user interface tasks. The Start Application was first released in AutoCAD Release 19. Start is one of the "truly unique" applications in AutoCAD LT and WebCenter, according to the company. Concepts Autodesk also produces Autodesk Rescue, a product which "helps users recover their DWG files when they are corrupted, damaged, missing or otherwise damaged." Autodesk Rescue exists in Autodesk AutoCAD LT and Autodesk AutoCAD WebCenter. Productivity AutoCAD and AutoCAD LT are primarily desktop applications with the ability to store data locally on a disk and later view and edit that data in another session. AutoCAD LT has some functionality and features that are specific to tablet use, such as the ability to edit existing objects on the screen with the stylus and the ability to "paste" other objects onto the screen. These features are available for Windows, iOS and Android, and can be used in addition to working with the mouse. The utility Sketch and the graphics application Dreamweaver CC can be used with AutoCAD LT for creation of web sites and advertising media. AutoCAD web applications are available on the Autodesk Exchange website, with AutoCAD 3000 selling for US\$249. AeroCAD LT is a variant of AutoCAD LT for use with a tablet with 2 GB of RAM and 128 GB of flash memory. Other software AutoCAD LT can use Autodesk TrueSight™, a middleware designed to enable the creation of product designs in 3D using either a two-dimensional (2D) model or a 3D model using data from a scanner or camera. With the release of AutoCAD 360 2018, Autodesk introduced a new product, AutoCAD 360 Cloud. Autodesk's 3D product line includes AutoCAD 3D, which is available on most of the platforms listed above.
