What's new:

- **Fifa 22 the game that kept saying no: how Carillion became the contractor for designing a game in one day. What's the development process like behind a game in one day? Microsoft picked up a lot of attention for the design process for Fifa 21 but one of the things that it has learnt from its technical architect Paul Sage is that it's possible to make the game in a day - but you have to choose a single day when you design and build your game.**

Why is it that FIFA won't let you make a shooter?

“We have characters, the FIFA universe is filled with characters. You can create characters easily in an MMO universe. We have realism that says there are too many action games. Action games are fun and I liked playing them. But a shooter is character based. Player movement is a key component of it. I have watched EA’s Battlefield series and that’s not realistic. In FIFA, if you look at the way players run, they move in a certain way.”

It's been a little quiet on the FIFA front this year, but I personally think it'll make a comeback this year.

Is FIFA a good indicator as to which console will be the biggest of the generation?

“It does indicate to an extent that the next gen will be on the next gen of consoles.

Do you still believe that FIFA is the game that is really needed right now to keep people subscribing?

“FIFA is the obvious title. We would do just a brand game if FIFA wasn't there at the same time.
