Contents show] Overview AutoCAD is a full-featured, 2D drafting and design software application. AutoCAD allows the user to create and edit objects, including geometric and topological elements, in 2D space. It can be used for a wide range of disciplines including engineering, architecture, mechanical design, industrial design, electrical and electronic design. AutoCAD is available on PC, Mac and mobile platforms. After the most recent major release (AutoCAD LT 2019), there are three AutoCAD subscription levels: AutoCAD Professional - \$12,000/year - includes perpetual upgrades. - includes perpetual upgrades. In addition to those apps, AutoCAD can also be run on iOS, Android, and Windows tablets. Features AutoCAD is a full-featured 2D CAD tool for designing, editing and modifying objects (geometric shapes, lines, arcs, circles, text, blocks, etc.) that are stored in one or more files. An AutoCAD drawing may consist of multiple objects and/or components. An object may be represented as a single geometric object or by a collection of linked components. It is also possible to include existing data in the CAD design. Some of the most important applications of AutoCAD are outlined below. Geometric shapes The 2D geometric shapes available

Features Autodesk has recently introduced new features, some of which were available to early customers. 3D features 3D modeling, more

accurately 3D visualizations, feature in two forms: 3D drawing feature, in which 3D models can be built and manipulated in a single window, similar to traditional 2D drafting (i.e. drafting and modeling) functionality. 3D drawing template, in which a template is provided which can be used to create new drawings with the same or similar objects, sections, and so on. 3D model visualization is also available. Improvements in 2D features In 2013 Autodesk released new features to improve the 2D drafting and design experience, including: Drawing import/export In version 2015, Autodesk provided the ability to import or export all or part of the drawing directly to or from the drawing file. In the late 1990s, Autodesk had provided a function called "clip" to copy the selected model from one drawing to another. Layouts and templates New in 2015, layouts and templates can be automatically applied to drawings that are created based on the design or sketch created. Part import/export Previously, Autodesk allowed users to import or export parts of drawings to the format of the drawing. Structural solid modeling Importing 3D solids into drawings is only available for certain applications. Part visualization Previously, 3D objects could not be viewed in a 2D view. In 2013, Autodesk introduced the "View" button in the ribbon. External links Autodesk Exchange References *

Mark Warner told Gizmodo that the CIA is not spying on Congress, and it's not spying on Senate intelligence committees. "We have not detected any change in the amount of data that CIA is collecting or the number of employees or sources that it has," Warner, the vice chairman of the Senate Select Committee on Intelligence, told Gizmodo. "And we're not seeing any change in what we're receiving either. I can't speak for the other committees, but we are not receiving any less data and no more personnel." Warner's comments came a week after FBI Director James Comey testified that the bureau spies on a foreign power to find out which committee members it will need to meet with. "We try to understand whether they will need a brief or a longer conversation or more follow-up after their meeting, and whether that will have an impact on the flow of intelligence we receive," Comey said. The Washington Post reported that Comey also told the Senate Intelligence Committee that the CIA was spying on them to learn which lawmakers would vote to approve the agency's budget. Warner told Gizmodo that he doesn't know who was spying on whom and he didn't know how it was done. "I don't know. I don't know how they managed to do it. But we've gone through the motions of finding out who was doing what and we can't determine that." Warner also told Gizmodo that the CIA has not been spying on him. "I've made no attempt to keep any kind of log of what they might be collecting on any particular committee member," he said. "There's nothing that I've
