more than one cause of dementia.<sup>12</sup> Percentage of mixed dementia in community-based studies. the development of the disease is guaranteed if they live a normal life. How do they live You can help people with dementia by supporting their habits that help them maintain their mental capacity and improve their quality of life. For example, many people with dementia take care of their dogs or take care of other family members who help them. Others help themselves. As with any other risk factor for developing the disease, you need to learn about the risk factors for dementia that may affect people with dementia in your community.
